

JACKSON HEIGHTS APARTMENT JACKSON HEIGHTS, NY

This complete apartment renovation focuses on providing an updated kitchen and enlarged bathroom. The new kitchen will be organized with the appliances along one wall with the opposite side clear for uninterrupted preparation space. While the soffit still defines the room, the kitchen now has a more open relationship with the rest of the living spaces. The bathroom will be increased in size by reorienting a bedroom closet. The new bathroom will have a large shower with bench as well as a custom storage unit. The dark floor will extend under the vanity and up the wall behind the toilet providing a more spacious feeling. The visual connection from the dining room to the living room will be enhanced by a reoccurring color and tile material palette. The renovated space will be clean, functional and unique.
